

Introduction

This is my introductory paragraph. The title will be placed above it automatically. **Do not start with an introductory heading** (e.g., “Introduction”). The title acts as your Level 1 heading for the introduction.

Details about writing headings with markdown in APA style are <https://wjschne.github.io/ap Quarto/writing.html#headings-in-apa-style>[here].

Displaying Figures

A reference label for a figure must have the prefix `fig-`, and in a code chunk, the caption must be set with `fig-cap`. Captions are in [title case](<https://apastyle.apa.org/style-grammar-guidelines/capitalization/title-case>).

New mode |Syntax |Example ———

- Code Prefix the code with # Number: 3
- Math Surround equation with `..` $-x$ is the opposite of x
- Markup Surround markup with `[..]` let name = [Typst!]
